=====
General comments:

- 88% of the class said the course was reasonably priced; 13% said it was too expensive; 0% inexpensive
- 100% of the class was satisfied with the check-in procedure
- 100% of the class was satisfied with the food

Setting

- 38% of the class said the venue was 'Great'
- 63% of the class said the venue was 'Not Bad'
- 0% of the class said they "Did Not Like" the venue

Course/Content

- Some graphs and tables were too small to read when projected and in print.
- Informative and valuable presentations.
- Most fun I have had at an LSP Seminar – hands on data eval was great and very worthwhile – working through data variability with other LSP's.
- Hands on testing was great. Broke up presentation while keeping focused on subject matter. Did not need the 5 minute break.

Suggested Seminar Topics

- 2014 MCP Changes

Suggested Speakers:

- Al Sitariko – USGS – BDX Fracture Flow.

Venue Comments:

- Lots of noise from adjacent group at end. Made is difficult to hear at end [of seminar].
- Nice to see power strips, I'll bring my laptop next time.

Misc Comments

- Recommend asking attendees to bring gloves and protective eyewear because of items being handled.
- Afternoon seminars should run 12-4PM instead of 1-5PM.
- Should be ½ of \$300 for 4 hours.

Course Handout Comments:
